AD VALOREM TAX DIVISION

Warren A. Bower, Director
Robert St. Clair, Assistant Director

PREFACE

For 1981 the taxable valuation of all real and personal property in the State totals $6,176,290,777 (this figure does not include motor vehicles, trailers or railroad cars owned by other than railroads). Of this amount, $4,778,338,204, or 77.37%, was State assessed, the balance of $1,397,952,573, or 22.63%, was assessed by the county assessors.

The Ad Valorem Tax Division also established valuations on 105 industrial properties amounting to $146,748,822, which were furnished to the assessors as a portion of their local assessments.

The 1981 valuation increased $1,661,156,978 over 1980, for a percentage gain of 36.79%. Of this increase, $1,524,595,280 resulted from State assessments, with the locally assessed property accounting for $136,561,698.

Oil production during 1980 decreased by 1,534,478 barrels; however, the taxable valuation increased by $1,034,510,382. Natural gas production increased 16,196,336 MCF's, and the valuation increased $214,956,083.

Coal production in 1980 was 21,734,965 tons over that of 1979, and the valuation increased $200,985,192. Trona production increased by 387,256 tons, and the valuation increased by $30,034,636. Uranium valuation increased $11,690,571. The valuation of all other minerals showed a decrease of $49,552.

Other State assessment increases were Pipelines $5,359,441, Railroads $4,884,278, Public Utilities $8,472,048, and Telephone and Telegraph $13,752,201.

The $136,561,698 increase in locally assessed property is represented by the increase in valuation of Lands and Improvements $30,038,792; Town/Rural Lots and Improvements $33,063,722 and Personal Property increase of $73,459,184.

Problem Areas

The Division is now assessing directly 1,135 companies including private car companies plus 105 industrial facilities. These properties must be located and certified to assessors in one or more of the 282 special taxing districts which include the 23 counties, 90 municipalities, 49 school districts, 52 fire districts, 33 cemetery districts, 14 recreation districts, 14 water and sewer districts, 2 water conservation districts, 1 special improvement district and 4 areas of separate bonding levies. (Mountain Bell has property in 206 separate taxing districts.)

The growth in the number of companies, the increasing number of separate accounts together with inflationary pressures have multiplied the Division's work load to the extent that our appraisers have not been able to review and confirm company reports by field inspection and auditing. The Division will request four additional utility appraisers in its 1983-84 FY Budget in order to reverse the current trend in assessment quality that is becoming more apparent.

The appraisal of agricultural land for ad valorem tax assessments is progressing well in counties with completed or nearly completed soil surveys. The Division has been unable to attract a qualified appraiser with a soils background to its staff. Therefore, the Division will request a special new position which will be responsible for training county personnel as well as division personnel and performing soils survey work in areas where comparison appraisals are not possible. This position will also be responsible for coord nating assessments along common county lines for better uniformity and equalit

Inflation affects all property differently. Generally speaking, the valu of any property is based on a buyer's opinion of the present worth of future benefits derived from ownership. Existing utility property values tend to be rather stable since regulatory agencies only permit them to earn on book value (historical cost). Unregulated property, such as housing, tend to increase in values as rentals increase, usually in proportion to replacement cost new. This difference presents two entirely different appraisal problems and two entirely different training programs for division personnel.

Our current staff is now at the maximum size (15) for the first time in five years. Some of our personnel still lack experience which comes with time and training (6 appraisers with less than four years experience).

During the balance of this fiscal year our in-house training programs wil continue to be utilized. No funds will be available for any professional training until FY-83/84.

The Forty-Sixth Legislature enacted the following laws affecting the Ad Valorem Tax Division:

Chapter 43--County School Tax

AN ACT to amend W.S. 21-13-207; and to repeal W.S. 21-13-202 through 21-13-205, 21-13-310(a)(iii) and 39-2-402(b)(i)(A) relating to the general county 3 mill property tax maximum contribution to schools; repealing the requirement for the contribution; modifying the method of distributing revenues within the county school fund; and providin for an effective date of May 20, 1981.

Chapter 108--Tax Exemptions for Veterans

AN ACT to amend W.S. 39-1-202(a) by creating a new subsection (vi) relati to veterans' property tax exemptions; specifying additional veterans entitled to a tax exemption; and providing for an effective date of May 20, 1981.

Chapter 126--Sunset Continuation

AN ACT to amend W.S. 28-10-102(a) and by creating a new subsection (b) and 28-10-103(b) and (f); and to repeal W.S. 28-10-102(a)(ii), (v) and (vi) relating to sunset audits; designating agencies to be audited, and to be terminated unless continued; providing for extension of agencies for periods other than six years; and providing for an effective date of July 1, 1981. The following shall terminat on July 1, 1983--Ad Valorem Tax Division of the Department of Revenu and Taxation.

Chapter 128--Delinquent Property Tax Penalty

AN ACT to amend W.S. 39-3-101(b) and 39-6-307(c) relating to property and mine products taxes; increasing the penalty for delinquent property and mine products taxes; providing for notice of property tax penalt rate increase; and providing for an effective date of March 4, 1981.

AD VALOREM TAX DIVISION
PHONE 307/777-7215

The Honorable Ed Herschler
Governor of Wyoming
State Capitol Building
Cheyenne, WY 82002

Dear Governor Herschler:

In compliance with the provisions of Chapter 39-1-303, Wyoming Statutes 1977, the Ad Valorem Tax Division of the Department of Revenue and Taxation submits its 1982 Annual Report. This report shows all taxable property in the State of Wyoming and the value of same in tabulated form.

Respectfully submitted,

DEPARTMENT OF REVENUE AND TAXATION

R. A. Hakala, Chairman
STATE BOARD OF EQUALIZATION

ANNUAL REPORT

of the

STATE BOARD OF EQUALIZATION

A DIVISION OF

DEPARTMENT OF REVENUE AND TAXATION

AD VALOREM TAX DIVISION

Warren A. Bower, Director

Robert St. Clair, Assistant Director

PREFACE

Objectives

The Ad Valorem Tax Division is the administrative arm of the State Board of Equalization. The primary duties of the Ad Valorem Tax Division of The Department of Revenue and Taxation can be directly traced to Article 15, Section 11 of the Wyoming Constitution, which reads in part: "All property.... shall be uniformly assessed for taxation and the legislature shall prescribe such regulations as shall secure a just valuation for taxation of all property, real and personal." This provision and the many enabling statutes describe what the Division has as its objective - providing uniform and just valuation of property.

The Board relies heavily on the county assessors and recognizes their importance in the administration of the Ad Valorem Tax Laws. The Board cooperates and assists the Assessors in any manner possible to ensure that all assessments are fair and equitable between property owners and between counties.

The Ad Valorem Tax Division is responsible for the accumulation of the necessary data for the Board of Equalization's use in determining the State General Fund Levy and the State School Foundation Levy.

Division personnel testify before the Board of Equalization during valuation appeals of both state or locally assessed property. The Division also investigates valuations, which will aid the Board in satisfying an appeal without the necessity of a formal hearing.

The Ad Valorem Division keeps the minutes of the proceedings, appeals and deliberations of the Board of Equalization in matters involving all types of taxation.

The majority of the assigned duties of the Ad Valorem Tax Division are found in the statutes relating to the State Board of Equalization, the Tax Commission and the Department of Revenue and Taxation. The statutes generally define three major categories of properties, "exempt", "state" assessed and "locally" assessed. Relative to the state assessed property, the Division gathers, compiles and analyzes information relating to the valuation of all mineral production, oil and gas production, pipelines, railroads, public and private utilities, telephone and telegraph companies and private railroad car companies. This information, along with the appraisal recommendations of the Division, are presented to the Board for its consideration in determining the fair assessed value of all state assessed properties. The Division then notifies all parties of interest. After the appeal time, these values are certified by the tax district to the county assessors to be included with locally assessed property as a basis for the levy of ad valorem taxes in various taxing districts within their respective counties. It should be noted that these state assessed properties now represent over 80% of the total State Ad Valorem Tax Base.

The Division, in cooperation with county assessors, prepares recommendations and guidelines for the uniform and equal assessment of locally assessed property. Division personnel inspect industrial complexes and plants throughout the state for the assessors. Applications for exemption of pollution control devices are also approved by this Division.

The Division compiles and maintains complete and current cumulative records of oil and gas production by counties; prepares and distributes annual reports relating to the taxable valuation of the state, by county and property classification; plans and conducts the annual assessor's school; meets with local assessors and other county officers on assessment matters; advises and confers with county assessors concerning the interpretation of the assessment and taxing statutes; aids the county assessors in the assessment of unusual properties in the various counties, and aids assessors with the instruction and supervision of local personnel hired to list the construction components of all buildings in the state for the revaluation program.

In addition to the direct constitutional and statutory duties, the Division also carries on many other activities - among these include the appearance of key personnel at public meetings to discuss the valuation and taxation process; meetings between Division personnel and individual and corporate taxpayers to discuss appraisal techniques used, equality and uniformity of local and state assessed values; conferences with other state tax officials to discuss mutual valuation problems. In line with the stated purpose of attaining uniform and equal valuations, the Division follows the policy established by the Board, by providing in-house training and cross training programs for our staff. Our training program also includes attendance at nationally recognized, professional appraisal schools by appraisal personnel as budgets permit. Our budget permitted 14 man weeks of professional training during FY 81-82.

The organization chart of this Division shows 15 full time employees authorized, including a director, assistant director, supervisor of state assessments, supervisor of local assessments, two (2) senior appraisers, six (6) staff appraisers, two (2) data coding technicians, and a secretary.

Because of the great amount of statistical information generated, many local, state and federal agencies look to this Division for information. State agencies we have supplied with information in the past year include the State Department of Education, the Department of Economic Planning and Development, the Department of Administration and Fiscal Control, Environmental Qualities, the Legislative Service Office, the State Planning Coordinator, other divisions in the Department of Revenue and Taxation and members of the Legislature.

In addition, we have had almost daily requests from non-government groups seeking data for feasibility studies on energy development, and environmental impact studies being conducted by private groups, governmental agencies, universities and industries.

Revaluation of Buildings and Town Lots

This program began fourteen years ago in 1968. All buildings in eighteen counties had been re-appraised by 1979. No counties have been completed since that time. Progress continues to be made in Big Horn, Carbon, Laramie, Natrona and Sweetwater Counties. The Division now estimates that Natrona County is over 50% complete. Only one county has made much progress in updating and equalizing town lot values. However, some counties are beginning to gradually move their lot value to a more current basis.

New construction has slowed from its record pace of 1981 except in areas of high mineral development activity. During FY-82, the Ad Valorem Tax Division's local assessment staff gave eight lister schools. The Division was able to render miscellaneous assistance on 19 other occasions and processed a total of 9,423 new property record valuations. The Division's staff has also revised 11,200 original property record card to reflect additions or deletions. A slide program initiated in 1980 to visually present instructional material given to listers at the county level and a lister's guide designed to assist in upgrading the listers educational program continues to be well received. Basically the revaluation program had as its objective the revaluation of all taxable buildings in the state as well as revaluation of all town lots. As each county completes the revaluation of its residential, commercial and rural buildings, the appraisal information is placed on our data processing file. Of major concern to assessors is the problem of obtaining building cost and current verified sales data. Wyoming is one of the few states having no statutory requirement for recording of real estate selling prices. This makes the collection of market data very difficult and an expensive task. The enactment of legislation to this effect would be a tremendous help to assessors and to the Ad Valorem Tax Division in compiling market data that would enable the Division to apply statistical methods leading to more equitable assessments.

Revaluation of Agricultural Land

Wyoming Statute 39-2-103 enacted by the legislature in 1973 requires all agricultural land to be valued for tax purposes based on its capacity to produce agricultural products. To comply with this legislation, an entirely new system of valuation needed to be put into effect. Soil classifications and productivity ratings of the Soil Conservation Service of the United States Department of Agriculture were determined to be the most commonly available data and were adopted as a basis for applying agricultural valuations. Since only 50% of the privately owned Wyoming agricultural land has been soil surveyed, this Division continues to urge legislative attention to a state supported program of soil surveys.

Meetings have been held in the past and will be held during 1982 with representatives from various agricultural organizations. The 1982 meetings will consider the Division's plan to update the agricultural land valuation base to a current year. Presently, agricultural land is based on production data from the year 1967 through 1976. Input from agricultural industry representative has been very useful in the past and the Division anticipates continued good relations in the future.

For the assessment year 1982, the 30% limitation on changes in agricultural land assessments initiated in 1977 was rescinded. In 1981, the Division sent letters to five counties indicating their continued unsatisfactory progress in equalization of this class of property would not be accepted in 1982.

The agricultural land revaluation program on the county level continues to require assistance and supervision of our staff. Except in one county, the Division's valuations of agricultural properties have been generally well accepted by the agricultural community.

Valuation of All State Assessed Property

This program has as its objective the valuation of all property required by law to be assessed at the state level. The accomplishments of this program can be best shown by showing the types of property assessed, the number of companies and the total valuation for the past year.

No. of Companies or Producers	Type of Company or Production	Assessed Value
402	Oil	$3,610,096,154
200	Natural Gas	978,556,981
20	Coal	989,695,692
8	Bentonite	20,876,884
69	Sand & Gravel	4,169,481
1	Taconite	18,202,439
4	Trona	147,417,617
14	Uranium	77,239,481
18	All Other Minerals	6,509,295
38	Pipelines	67,625,024
99	Public & Private Utilities	422,429,287
6	Railroads	108,042,032
17	Telephone & Telegraph	139,864,132
	TOTAL	$6,590,724,499

It should be noted that in 1982, State assessed property represented approximately 81.5% of the total taxable valuation of the State.

The continuing yearly increase in the number of assessments and the valuation of State assessed property is a reflection of the industrial and mineral related growth which is occurring in Wyoming plus the growth in the number of taxing districts continues to increase the work load of the Ad Valorem staff.

All of the foregoing valuations are certified to the local assessors in whose county the property is located, or the minerals are produced.

There is a constant effort to update appraisal techniques used by the Division with regard to each type of property. We plan to continue these efforts as time and staff limitations permit to ensure that the properties are assessed as uniformly and as equitably as possible.

Assistance to Local Assessors

This program has as its objective a continuous program to assist all of the assessors in the many and varied problems of local assessments. Local assessments comprise approximately 18.5% of all of Wyoming's taxable valuations and amounted to $1,522,994,807 in 1982. While these assessments are classified as local, the Ad Valorem Tax Division directly contributes a large portion of these values for the assessor. For instance, this Division has appraised the valuation of some 20,620 residential, rural and commercial buildings for the local assessors in FY-82.

The Ad Valorem Division also appraised 120 industrial plants and complexes which had a total taxable valuation of some $169,628,000. The appraisal of these industrial properties requires frequent on-site inspection of the plants, with close attention to yearly changes and allowable exemptions for pollution control devices. While these properties are local assessments, the Division provides this service as part of our program of assisting the local assessors as well as providing for continuity and record keeping in the event of an assessor change.

The Division also provides recommendations and suggests guidelines to the assessors for most other types of property located within their county. Among the published guidelines and recommendations we provided to the assessors last year were the valuations for grazing land, dry farm lands, boats, tractors, construction equipment, bowling alley equipment, drilling rigs and equipment, aircraft, oil field equipment, commercial furniture and fixtures, livestock values (which are only subject to predatory and brand inspection taxes) and mobile and transportable home valuations.

In addition, we supply the assessors with information on the legal limits for mill levies and provide almost daily information, by telephone or letter, in answer to the many requests for information and assistance that we receive from the assessors.

The Division provides a frequent updating of information contained in an assessor's handbook which was compiled and furnished to the assessors by this Division. This includes such information as the interpretation of the statutes, opinions of the Attorney General relative to assessment and taxation, general information relative to the duties of the assessor and operation of the office and a multitude of other pertinent information.

Problem Areas

The Division is now assessing directly 1,110 companies including private car companies plus 120 industrial facilities. These properties must be located and certified to assessors in one or more of the 282 individual taxing districts which include the 23 counties, 91 municipalities, 49 school districts, 53 fire districts, 37 cemetery districts, 14 recreation districts, 17 water and sewer districts, 11 hospital districts, 1 museum district, 4 solid waste districts, 2 water conservation districts, 5 improvement and service districts and 4 areas of separate bonding levies. (Mountain Bell has property subject to 208 individual taxing authorities.) These special districts were created by the legislature to provide taxing authority outside of constitutional limitations on tax rates. The 1982 Legislature recognizes that the growth in the number of companies, the increasing number of separate accounts together with inflationary pressures have multiplied the Division's work load and provided for three additional utility appraisers beginning in FY-83.

The appraisal of agricultural land for ad valorem tax assessments is progressing well in counties with completed or nearly completed soil surveys. The Division has been unable to attract a qualified appraiser with a soils background to its staff. Therefore, the Division requested a special new position which would be responsible for training county personnel as well as division personnel and performing soils survey work in areas where comparison appraisals are not possible. This position would be responsible for coordinating assessments along common county lines for better uniformity and equality. This position was not approved by the Budget Division.

Inflation affects all property differently. Generally speaking, the value of any property is based on a buyer's opinion of the present worth of future benefits derived from ownership. Existing utility property values tend to be rather stable since regulatory agencies only permit them to earn on book values (historical cost). Unregulated property, such as housing, tend to increase in values as rentals increase, usually in proportion to replacement cost new. This difference presents two entirely different appraisal problems and two entirely different training programs for division personnel.

Legislation

The Forty-Sixth Legislature enacted the following laws affecting the Ad Valorem Tax Division:

PROPOSED CONSTITUTIONAL AMENDMENT - (ORIGINAL HOUSE JOINT RESOLUTION NO. 3, 1981) Proposing an amendment to Article 15, Sections 15 and 17 of the Constitution of the State of Wyoming to provide for an additional state levy of six mills for education, to decrease the county levy for education from twelve to six mills and to permit the legislature to authorize a special school district property tax levy and to determine allocation of a portion of this levy for the support of education among the several school districts within the state. This amendment will be voted on in November, 1982.

The 1982 Session enacted the following laws affecting the Ad Valorem Tax Division:

AN ACT to amend W.S. 18-3-509(b) introductory paragraph and 39-2-402(f)(v) relating to county taxes for fire protection; providing for an increase in the authorized mill levy from one-half to one mill; and providing for an effective date of July 1, 1982.

AN ACT to amend W.S. 39-1-204 relating to the home owner's tax credit; defining the credit to be allowed; providing qualifications and procedures for claiming the credit; providing for reimbursements to county treasurers for lost revenues; providing definitions; and providing for an effective date of June 1, 1982.

AN ACT to amend W.S. 39-4-102(a)(i) and (iv) and (b)(i)(B) and (ii) relating to fees and interest payable for sale and redemption of property for tax delinquency; increasing fees for advertising sale, travel costs and certificate of redemption; increasing the interest rate payable for a certificate of redemption; and providing for changes to be effective for tax sales in 1982 and thereafter.

AN ACT to amend W.S. 39-1-304(a) by creating new paragraphs (xi) through (xx); and to repeal W.S. 39-1-303(a)(x) through (xix) relating to duties of tax commission and board of equalization; repealing certain tax commission duties and providing for them to become duties of the board of equalization; providing for the continuation of the ad valorem tax division; and providing for an effective date of July 1, 1982.

Litigation

Litigation relating to equalization of assessed values for certain electric utility property were concluded in FY-82.

These settlements resulted in downward adjustment for the years in question and the adoption of an equalization factor of 15% which more nearly equalized this class of property with other property for 1982 assessment.

The appeal of Thunder Basin Coal Company (ARCO) from their 1981 coal assessment is currently in the District Court. Thunder Basin Coal contends that language in Chapter 126 of the 1975 Session Laws (W.S. 39-2-202) requiring that minerals must be removed from the mine and placed in storage prior to being valued does not apply to their coal because beneficiation occurs prior to storage. The Division contends that their valuation complies with the statute since any value relating to beneficiation is excluded by appraisal. Thunder Basin also appealed their 1982 assessment.

Other litigation and appeals pending are as follows:

1. Denial of Pollution Control Exemption for Uranium Tailings Ponds, Coal Storage Shed and Trona Storage Shed.
2. Denial of pollution control exemption for certain equipment that was utilized on assessment date.
3. An appeal from a firm that contends most of their aircraft should be exempted as merchandise inventory. The assessors contend they should be taxable because they are used for charter flights.
4. An appeal from a large ranch from its ad valorem tax assessment claiming a lack of equality.

Overview

Taxable valuations in Wyoming, excluding motor vehicles and private railroad cars, increased $1,935,850,069 over 1981 to $8,112,140,846 (29%). Taxable values increased $3,597,007,047 (79%) over 1980, and $4,409,514,316 (119%) over 1979 totals. The 1982 increase exceeded the total state valuation of 1974, and taxes levied on 1982 valuation ($524,795,294) exceeded the state's total assessed value of 1948.

The taxable value increases have not resulted in significant tax rate (mill levy) changes. Taxes collectible by major category have increased almost parallel to valuation increase except in municipalities.

	Municipal Taxes	County and Special District Taxes	School Taxes	Total Taxes
1979	$4,683,895	$53,737,772	$190,363,624	$248,785,241
1980	5,172,668	63,229,730	230,012,808	298,415,206
1981	5,474,432	90,446,062	302,100,366	398,020,890
1982	5,910,941	115,971,340	402,913,443	524,795,724
1982/1979	26%	116%	112%	111%

In spite of the continuing decline in production, crude oil contributed 67% of the valuation increase ($1,290,401,596). Natural gas and natural gas liquid production contribued 16% of the valuation increase ($302,699,603) as the number of units increased slightly and the natural gas policy act of 1978 allowed increasing prices. Coal increased $216,061,958, contributing 11% of the 1982 increase. Taxable coal tonnage increased 7,882,984 tons.

The state became more dependent on mineral production to fund its ad valorem tax needs in 1982. Mineral productions share of the tax base increased to 72.15% in 1982 ($5,852,764,024).

Utility property accounted for only 9.1% of the ad valorem tax base in 1982. The balance of the tax base (18.75%) was provided by the 23 local assessors.

NOTE: Total valuations and the valuations for Campbell County on pages 1 through 18 are $4,557,698 greater than reflected in the Levy Section because a large 1981 valuation error was credited to the taxpayers 1982 valuation.
